TEKMAR

TARGET TB500

COMPACT

QUIET

FULLY ASSEMBLED

MADE IN USA

CLEAN

AIR DRIVEN

The TARGET SYSTEM TB 500 is the ideal replacement for aerosol adhesives. Perfect for small to medium sized screen print shops, working with manual and automatic presses. Snapping easily onto a special 1 gallon bucket, the exceptional economy of the system eliminates the need for frequent refills. Fully adjustable for both fluid and air flows, the stainless steel tipped spray gun utilizes HVLP technology, allowing the application of a perfect mist coating of adhesive, while minimizing overspray.

Fully assembled and ready to use, the system's air requirements are 40-60 PSI at 2 CFM, which allows it to be powered by a very small compressor. When used with Tekmar's Water based adhesive, the TARGET SYSTEM TB500 can provide cost savings of over 600% when compared to aerosols. The TB 500 is the perfect environmental solution, guaranteed to save $$$ over aerosols and other systems
